

About Subtle Energy

Scientists studying the motion of galaxy clusters in outer space have made a revolutionary discovery. They have undeniable evidence that an ancient energy form, (we call it Subtle Energy), exists in Dark Matter, or, the Subatomic World. Some scientists believe that this particular energy effects our health and the use of it in the healing professions holds enormous benefits for improving our quality of life. This energy form, known to the Ancients of the East in their use of acupuncture is now generated for the first time ever through a fascinating new technology. It will change the way we view modern medicine forever.

Curiously, Western scientists of the late 1800's believed this energy existed in the Etheric World, (also called the Subatomic World), which is the world of energy that comes before our physical world. They believed this energy to be vitally important for the functioning of our body organs. The Ancients of the East believed this too, but they also thought that there was a spiritual part to this energy as well. They said that this energy changes as we age but the core of it remains the same. Traditional Chinese Medicine practitioners call Subtle Energy, "Chi" (pronounced CHEE).

Dr. Joie Jones of the University of California in Irvine proved the existence and effect of Subtle Energy on and in the human body. Using the most sophisticated scientific tool, the MRI (Magnetic Resonance Imaging), he found that when the acupuncture point of the toe known to influence vision is stimulated, a signal is actually sent to the visual cortex of the brain. And there's more. The signal from the toe to the brain travels a thousand times faster than a signal sent through the eyes to the brain.

Dr. Yury Kronn, a well-known and respected Russian quantum radio-physicist, has developed a proprietary technology that can copy the Subtle Energy patterns of every atomic element on the periodic table. He spent more than 20 years researching the Subtle Energy phenomena and has invented a plasma-based, computerized device that generates energetic signatures and then separates the Electro-magnetic energy from Subtle Energy. He calls his invention, "Vital Force Technology (VFT)."

The use of Subtle Energy in different healing products has tremendous implications for those in the healing professions. Subtle Energy increases the healing affect of remedies and nutritional products without increasing their dense physical substance. This means that the remedy works better, without increasing its possible negative side effects.
